

Bonding & Sealing Solutions. It's not just what we do, it's who we are.

TITAN is 100% focused on Bonding & Sealing Solutions for transportation, building construction and product assembly manufacturing applications.

Working closely with regional and global adhesive and tape manufacturers, we deliver proven, innovative solutions tailored to your needs. We can even develop completely custom solutions. In fact, over 20% of our solutions are created with our channel partners through a collaborative, co-developed process. Each custom created solution undergoes extensive, rigorous testing in our own in-house lab, technical labs of our strategic partners and external testing agencies, as well as extensive field testing. So you can be confident that our solutions will stand the tests of the environment as well as the test of time. And with over two million dollars of Bonding and Sealing product inventory, TITAN helps ensure your production process keeps flowing. **From product to process, TITAN is ready to deliver the right Bonding & Sealing solution.**
