

# Silaprene® High Performance Adhesives & Sealants

## SOLIDBOND®

- One component high viscosity moisture curing polyurethane adhesive
- Can be used to replace rivets, welds and other mechanical fasteners
- Non-sag properties, paintable, non-staining
- Low VOC, odorless and particularly low volume shrinkage

## SOLIDSEAL®

- One component moisture curing polyurethane adhesive/sealant
- Used to bond and seal various metals, plastics, fiberglass and wood
- Permanently flexible, paintable, low solvent
- UV stable, heat and moisture resistant

## SOLIDSEAL® GP

- One component moisture curing polyurethane adhesive/sealant
- Used for bonding side-walls, roof-bows and flooring panels
- Overpaintable after curing, waterproof, remains flexible
- Fast skin and cure time with high bond strength

## SOLIDSEAL® MS

- One component silyl-modified polyether (MS) adhesive/sealant
- Used to bond and seal lap seams, dynamically moving joints and perimeter caulking
- Instant paintability, solvent free, 100% solids
- Excellent UV stability and has extended elasticity and appearance integrity

## SOLIDSEAL® 216

- One component sprayable silyl-modified polyether (MS) adhesive/sealant
- Used on seams and joints that require the adhesive/sealant to be applied by spraying
- Elastic, paintable and has longer open times to control spray patterns
- Highly resistant to chemicals, humidity and weathering

## SOLIDSEAL® SP

- One component silyl-modified polyurethane (SPUR) adhesive/sealant
- Used to seal and bond to a wide variety of substrates where high initial tack is needed
- Excellent gap filling sealant and has rapid hardening
- Instant paintability, solvent free, 100% solids

## ROYAL SEAL 1000®

- One component block copolymer sealant
- Used as a top sealant that will not crack or chalk
- Excellent UV and ozone resistance
- Finger-toolable

## HAPs FREE SEALANT®

- One component block copolymer sealant
- Used as a top sealant where hazardous air pollutants are a concern
- Excellent UV and ozone resistance
- Finger-toolable

## ALL WEATHER SEALANT®

- One component EPDM based polymer HAP's Free sealant
- Used as a flexible roof and seam sealant that can be self-leveling or non-leveling
- Paintable after 24 hours
- Excellent UV and ozone resistance
